THE ELECTIVE MANDATORILY THROUGH SWAYAM

The SWAYAM MOOCs platform is the world's largest online free e-learning platform portal. It aims to uphold the three cardinal principles of Education Policy: Access, Equity, and Quality. The platform offers a diverse range of courses, encompassing school/vocational, undergraduate, postgraduate, engineering, and other professional subjects.

SWAYAM (Study Webs of Active-Learning for Young Aspiring Minds), an indigenous MOOC platform developed by AICTE in 2016, aims to facilitate free and accessible online courses for all learners. By offering a diverse range of courses from high school to higher education, including skill-based programs, SWAYAM strives to uphold the three cardinal principles of Education Policy: Access, Equity, and Quality. As one of the world's largest MOOC platforms, SWAYAM ensures that every student can benefit from high-quality learning materials through its integrated platform.

SWAYAM courses encompass four key components:

- (1) Video lectures,
- (2) Downloadable or printable reading materials,
- (3) Self-assessment tests and quizzes,
- (4) An online discussion forum for resolving student queries.

To enhance the learning experience, these courses leverage audio-visual and multimedia elements, incorporating state-of-the-art pedagogical and technological approaches.
